Professional Summary

Results-driven Software Engineer with hands-on expertise in AI/ML product development, backend engineering, agentic AI systems, DevOps, and cloud infrastructure. Currently building and maintaining an **AI Governance, Risk & Compliance (GRC) SaaS product** at CognitiveView with end-to-end ownership spanning backend APIs, cloud infrastructure (Azure, Cloudflare), CI/CD pipelines, and full-stack feature delivery. Seeking roles at the intersection of **AI engineering, product development, and AI governance** within MNCs, fintechs, and GRC-focused organisations.

Experience

Software Engineer — ML & Product Development **Jun 2025 – Present**
CognitiveView Pvt. Ltd., Bhubaneswar

- Own contributions to the company’s flagship **AI GRC & Assurance product**, covering backend APIs, cloud infrastructure, agentic AI capabilities, and full-stack feature development.
- Architected an **agentic AI system** for automated market research and lead generation, expanding outreach capacity approximately **5×** while significantly reducing manual effort across the sales pipeline.
- Manage the company’s full cloud and infrastructure stack across **Microsoft Azure** and **Cloudflare**, driving cost optimisation initiatives that reduced monthly infrastructure expenditure.
- Established and maintain **CI/CD pipelines** and Docker-based deployment strategies, improving release reliability and deployment frequency across production and staging environments.
- Delivered an **internal web platform** using **Next.js** (frontend) and **FastAPI** (backend) to support internal operational workflows.
- Act as the de facto **DevOps engineer** — handling containerisation, environment orchestration, and production monitoring.

Software Development Intern — Machine Learning **Jan 2025 – Jun 2025**
CognitiveView Pvt. Ltd., Bhubaneswar

- Built scalable backend APIs with **Python, FastAPI**, and **MongoDB**, integrating **Stripe** for payment processing and achieving a **20% improvement** in transaction handling speed.
- Implemented **OpenAI LLM** and **Retrieval-Augmented Generation (RAG)** features, enhancing real-time data processing capabilities of the GRC platform.
- Designed a customer onboarding system that automated registration and verification workflows, reducing client activation time and improving operational efficiency.

Education

B.Tech — Computer Science and Engineering **2021 – 2025**
Silicon University, Bhubaneswar CGPA: 8.65 / 10 ≈ 81.5%

CBSE 12th Board **2019 – 2021**
Demonstration Multipurpose School, Bhubaneswar 83.40%

CBSE 10th Board **2019**
Demonstration Multipurpose School, Bhubaneswar 93.00%

Skills & Technologies

Programming	Python, Go, JavaScript, SQL, C
Frameworks	FastAPI, Next.js, React.js (Vite), Streamlit, TensorFlow, Scikit-Learn, Pandas
Cloud & DevOps	Microsoft Azure, Cloudflare, Docker, CI/CD Pipelines, Infrastructure Management
Databases	MongoDB, Oracle Database
AI / ML	OpenAI APIs, RAG, Agentic AI Systems, Generative AI, LLMs
Tools	Git, Postman, Stripe API, Azure CLI
Domains	AI Governance, GRC, Data Governance Concepts, Backend Engineering, DevOps, Data Science, IoT
Data	Data Modeling, No-SQL Schema Design, Data Management, Data Quality Fundamentals, Data Governance

Selected Projects

Project Pi	2025
Full-stack music streaming system running a Go server on a Raspberry Pi, using Cloudflare Tunneling to securely serve locally stored music files to users over the internet without port-forwarding. Demonstrates self-hosted infrastructure and network engineering thinking.	
[Backend] [Frontend]	
PIXEL — Your Desktop Pet	2025
An interactive animated desktop companion powered by an LLM backend , designed to behave as a conversational on-screen pet. Explores real-time LLM integration, UI responsiveness, and personalised AI interactions in a creative context.	
[Repository]	
Google Gemini API Application	2024
Multimodal web app using Streamlit and the Google Gemini API to generate text responses from image and text prompts. Achieved 90% user satisfaction in beta testing.	
[Live App] [Repository]	
IoT Car Crash Detection System	2024
Microcontroller-based crash detection system using an ESP32 to dispatch GPS location alerts to emergency contacts within 5 seconds of impact via Blynk IoT APIs.	
[Repository]	
Housing Price Prediction	2024
Regression model with 87% accuracy on the Boston and California Housing datasets (Scikit-Learn), deployed as an interactive Streamlit web app for real-time predictions.	
[Repository]	
Student Placement Classifier	2023
ML classification model with 85% accuracy predicting campus placement outcomes from academic and demographic features using Python and Scikit-Learn.	
[Repository]

Certifications

Reinforcement Learning — MathWorks	2026
Introduction to Data Management — Meta	2026
AI Strategy and Governance — University of Pennsylvania	2026
Generative AI — Syllogistek Systems	2024
Introduction to Data Analytics — Meta	2024
Foundations: Data, Data, Everywhere — Google	2024
PWC Launchpad Program — PWC	2024
Data Science, Deep Learning & ML using Python — Syllogistek Systems	2023
Ethical Hacking — NPTEL	2023
Data Analytics — Masai School	2021
