About

Dedicated and results-driven professional with a strong background in Data Science, Machine Learning, and Artificial Intelligence. Adept at working in a team as both a leader and player. Seeking to leverage my skills and experience to contribute to the industry through my skills in **Python, Data Science, Artificial Intelligence, Machine Learning, Web Development, Cloud Computing, IoT, Software Engineering and Generative AI**. Proficient in various platforms, languages and technologies.

Education

Silicon University, Bhubaneswar <i>B.Tech – Computer Science and Engineering</i>	2021 – 2025 CGPA: 8.47/10 $\approx$ 79.70%
Senior School – 12th , Demonstration Multipurpose School, BBSR <i>CBSE (12th Board)</i>	2019 – 2021 Percentage: 83.40
High School – 10th , Demonstration Multipurpose School, BBSR <i>CBSE (10th Board)</i>	2009 – 2019 Percentage: 93.00

Projects

- Portfolio Website (2024)**
 A vite based ReactJS front-end website containing my educational and professional information. Deployed on Netlify.
 Link: [Deployment Link](#) — [Repository Link](#)
- Google Gemini API Application (2024)**
 Application created using Streamlit. It uses Google Gemini API to fetch and provide generative text responses from image and text prompts/queries.
 Link: [Deployment Link](#) — [Repository Link](#)
- IoT and Embedded Systems Project for Car Crash Detection (2024)**
 IoT-based project where a crash detected by a micro-controller causes a trigger to send the location of the crash to a set of emergency numbers.
 Link: [Repository Link](#)
- Housing Price Prediction (Regression Algorithm) (2024)**
 This project contains the Jupyter Notebook files which are based on AI/ML techniques and contain machine learning models based on two popular datasets 'Boston Housing Prices' and 'California Housing Prices'. The project introduces a web-based application that can be used to find the pricing of houses.
 Link: [Repository Link](#)
- E-Commerce Website for Arts and Crafts (Artisan's Avenue) (2023)**
 Beautiful and responsive website with multiple features for interactive and user-friendly operation. "Artisan Avenue" used HTML5, CSS3, JavaScript, JSON, and Oracle Database.
 Link: [Repository Link](#)
- Student Placement Classification (2023)**
 ML classification project that predicts student campus placements based on a dataset of academic and demographic features. This project involves data pre-processing, model training, and evaluation to provide insights into the factors influencing placement outcomes and to enhance prediction accuracy.

Skills & Technologies

Skills: Data Science, Deep Learning, Artificial Intelligence, Data Analysis, Software Engineering, IoT, Generative AI, Cloud Computing

Technologies: Python, SQL, TensorFlow, SciKit Learn, Pandas, JS, MongoDB, C, Git, Tableau

Courses & Certifications

Introduction to Data Analytics Meta - Coursera ↗	2024
Foundations: Data, Data, Everywhere — Coursera Google - Coursera ↗	2024
Generative AI Syllogistek Systems ↗	2024
The Joy of Computing with Python NPTEL ↗	2024
Data Science, Deep Learning and ML using Python Syllogistek Systems ↗	2023
Ethical Hacking NPTEL ↗	2023
Data Analytics Masai School ↗	2021
Introduction to IoT and Embedded Systems Coursera ↗	2021
TCS iON Career Edge - Young Professional TCS iON Training	2020

Languages

- English
- Hindi
- Odia

Hobbies

- Playing Guitar and Singing
- Watching Technical Content on YouTube
- Doing Hands-On Projects
